

Poorya Javadifar Front-End Developer

pooryaj.ir | thepooryaj@gmail.com | +989215881351 | [LinkedIn](#)

About

I've been doing Frontend development for about 2+ years, most of which spent using React. Although React was my framework of choice, at the end I consider myself a Frontend developer rather than a React developer, so I don't limit myself to it and I'm open to use any other tools that suit the job. I enjoy diving deep into the technologies I use day by day and learning better patterns for what I'm doing.

Skills

Confident in:

- JavaScript, HTML, CSS / SCSS
- React
- Redux
- Styled-Components
- Testing with Jest and React-Testing-Library

Familiar with:

- Nextjs
- Typescript
- Webpack and Babel
- Vite
- Other frameworks like Svelte and Vue

Work

Landin | app.landin.ir

- Built and maintained an online editor for making landing pages
- Delivered huge updates while maintaining backwards compatibility
- Made an iframe library for rendering react components in it, with good browser support and high customizability

Technologies used: React, Redux, Styled-Components, Handlebars
